Application No. 10/595,733 Amendment Dated 10/28/09 Reply to Office Action of 4/28/09

Abstract

Laser Machining Apparatus and Laser Machining Method

Disclosed is a laser machining apparatus comprising a workpiece fixture [[(10)]] for fastening a workpiece [[(1)]], a first laser removing device [[(11)]] for machining a workpiece using first operating parameters, and a second laser removing device [[(12)]] which can machine a workpiece using second operating parameters that are different from the first operating parameters, especially regarding the quality and quantity.
